

20 December 2007

Novera Energy plc ('Novera')

Planning Application for Glenkerie Wind Farm

Novera is pleased to announce it has submitted a planning application for a proposed wind farm to be known as Glenkerie Wind Farm, located 5km north west of Tweedsmuir and 12km south east of Biggar, in the Scottish Borders region.

The application is for 11 wind turbines with an expected capacity of 22-27MW.

This is in addition to the planning application for the proposed 10MW Fleeter Wood Wind Farm announced on 17 December. Novera expects to submit a third application shortly, to give a total of four sites in planning with a combined potential of 78-91MW of capacity by end 2007. This will keep us on track to have 250MW of onshore wind capacity in production by 2011.

Ends
