**Notes to editors:**

Novera's focus is UK renewable energy generation and has a portfolio of landfill gas, wind and advanced energy from waste.

Novera is the joint owner with Macquarie International Infrastructure Fund Limited of Novera Macquarie Renewable Energy Limited (NMRE), one of the largest diversified renewable energy portfolios in the UK. In the establishment of NMRE, the joint venture acquired the former assets of Novera Energy Europe Limited (NEEL) and United Utilities Green Energy Limited (UUGEL). NMRE owns and operates mature, proven and low risk renewable energy generating assets, including landfill gas (LFG), small hydro and wind power. As at 31 December 2005, the business had installed operating capacity of 122 MW at 59 sites in the UK and Germany.

NMRE renewable energy generating asset portfolio at 31 December 2005:

Asset	Location	Sites in Portfolio Capacity	MW Operational	MW Construction/ Development	Portfolio Capacity
LFG	UK	45	86	7	93
Wind	UK/Germany	3	9	15*	24
Hydro	UK	10	16	-	16
Industrial	UK	2	11	-	11
Total		60	122	22	144

*\* now operational and in ramp up to full capacity, representing NMRE's 60<sup>th</sup> site*

Novera has a wind energy greenfield development portfolio of 30 sites and expects to submit a formal planning application for a 20 MW site mid 2006.
